CAREER OBJECTIVE

Aspiring Software Engineer with hands-on experience in Python, ML model development, and full-stack system design. Dedicated to building efficient, secure, and user-centric applications. Eager to join an innovative team where I can contribute to real-world projects, expand my technical capabilities, and deliver meaningful solutions.

TECHNICAL SKILLS

Programming & Frameworks: Python, ASP.NET Core, PyTorch, Scikit-learn, Hugging Face

Data Handling & Visualization: NumPy, Pandas, Matplotlib, Seaborn, SQL

Backend & Deployment: Flask, FastAPI

Version Control: GitHub

PROJECTS

Lung Cancer Classification

Tools: Python, PyTorch, Flask, MobileNetV3, Grad-CAM, Docker

- Developed an AI-powered web application for classifying lung tissue images into Adenocarcinoma, Benign, and Squamous Cell Carcinoma.
- Integrated a custom-trained PyTorch model with Grad-CAM visualization to highlight diagnostic regions in medical images.
- Built an interactive Flask interface for real-time predictions and containerized the entire system for deployment using Docker.

Github: [Lung Cancer Classification](#)

Customer Churn Prediction

Tools: Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Built end-to-end churn prediction pipeline including preprocessing, feature engineering, handling class imbalance, and model evaluation.
- Trained and compared multiple ML models (Logistic Regression, Random Forest, XGBoost, etc.) to identify high-risk customers.
- Performed exploratory data analysis (EDA) and visualized feature correlations to understand churn drivers.

Inventory Management System

Tools: ASP.NET Core MVC, C#, Entity Framework Core, SQL Server, HTML/CSS, Bootstrap

- Developed a full-stack inventory management system with secure user authentication, role-based access control, and centralized product tracking.
- Implemented modules for managing products, suppliers, purchases, and sales with real-time stock updates.
- Integrated reporting features to generate sales summaries, purchase history, and inventory status for efficient business decision-making.

EDUCATION

International University of Business Agriculture and Technology

May 2022 - May 2026

Bachelor of Computer Science and Technology | CGPA: 3.93 out of 4.00

Gazipur Metropolitan College

2018 - 2020

Higher Secondary School Certificate | GPA: 5.00 out of 5.00

RESEARCH EXPERIENCE

A Data-Driven Approach to Customer Churn Prediction in E-Commerce Business Using Machine Learning

Authors: Sazibul Islam Siam, Faisal Imran, Maliha Anjum, Kasfia Mostafa

DOI Link: [10.1109/QPAIN66474.2025.11172144](https://doi.org/10.1109/QPAIN66474.2025.11172144)

A Hybrid Deep Learning Framework for Robust Detection of Rice Leaf Diseases Using CNN and Transformer-Based Attention

Authors: Kasfia Mostafa, Faisal Imran, Maliha Anjum, Sazibul Islam Siam

DOI Link: [10.1109/QPAIN66474.2025.11171957](https://doi.org/10.1109/QPAIN66474.2025.11171957)

ADDITIONAL INFORMATION

- Languages:** English, Bangla.

- Certifications:**

Python with Machine Learning [EDGE, ICT Division, Bangladesh]

Python, Kaggle [Date of Completion: June 2025]

- Awards:**

4 times Dean's Awardee

1 times VC's Awardee
